Summary

QA Automation Engineer with a fullstack profile. I design and automate API and UI tests for banking systems, and build the tooling that makes testing faster: load-testing analytics, test-environment monitoring, test-data generation, and RAG-based autotest generation. Comfortable across the whole stack — Java, Python, TypeScript; FastAPI, React, PostgreSQL, Docker, CI/CD. Winner of the company-wide "Best Tester" award, QA conference speaker (Testify, Heisenbug).

Experience

QA Automation Engineer June 2024 – Present
RSHB-Automation & RSHB-INTECH (IT subsidiaries of Russian Agricultural Bank) *Moscow, Russia*

- Designed 86 API test cases and developed 164 automated API and UI tests in H2 2025 within the bank's loan origination platform
- Automated user migration from a legacy Lotus Notes email service by building a UI parser (Java 21 + Selenide) that preserved all user attachments
- Built a fullstack load-testing analytics tool (Python + Streamlit + PostgreSQL): integrates 7 metric sources (Zabbix, Prometheus, InfluxDB, Grafana, Kibana, Oracle, PostgreSQL), automatically compares releases highlighting deviations, and exports reports to web, docx and xlsx
- Developed Down Detector, a fullstack monitoring service (Python + FastAPI + TypeScript + React) covering REST services across all of the company's test environments, giving QA engineers real-time visibility into test-stand health
- Built a RAG pipeline that generates automated tests from manual test cases (Python + Sentence-Transformers + Apache Airflow), significantly speeding up test automation across the team
- Researched embedding and reranker models for keeping test-case-to-autotest mappings up to date
- Refactored the legacy backend of a test-data generation service (bank-client generator): split the monolith into microservices, improving maintainability and enabling the project to scale

Awards & Talks

Winner | *"Best in Profession" company-wide contest, "Best Tester" nomination (RSHB-Automation)* May 2026
Speaker | *Testify #12, QA community meetup* Dec. 2025
Exhibitor | *Heisenbug Spring 2025, software testing conference* Apr. 2025

Education

MIREA — Russian Technological University Moscow, Russia
M.S. in Computer Science and Engineering *Sep. 2023 – Jul. 2025*

Moscow Power Engineering Institute (NRU MPEI) Moscow, Russia
B.S. in Information Security *Sep. 2019 – Jul. 2023*

Technical Skills

Testing: REST API testing, UI test automation, Playwright, Selenide, Allure, Rest-assured
Programming: Java, Python, TypeScript, C/C++
Backend: Spring, FastAPI, SQLAlchemy
Frontend: Vue 3, Streamlit
CI/CD & DevOps: Git, Docker, Docker Compose, GitHub Actions, Apache Airflow
Databases: PostgreSQL, Milvus, QDrant, ELK Stack
AI & ML: RAG, embeddings & rerankers, Sentence-Transformers
Languages: Russian (native), English (B1)
